OBJECTIVE

Results-driven Computer Science undergraduate with strong foundation in Data Structures and Algorithms, full-stack web development, and AI-based application development. Experienced in building scalable systems using FastAPI, REST APIs, and workflow automation on the ServiceNow platform. Seeking an internship to leverage problem-solving skills and technical expertise in developing efficient, data-driven, and scalable software solutions.

EDUCATION

B.Tech CSE (AIML), Mohan Babu University 2023 – 2027
CGPA: 9.66 / 10

Intermediate (MPC), Narayana Junior College 2021 – 2023
Score: 95%

SSC, Oxford English Medium School 2021
Score: 100%

SKILLS

Languages: Java, HTML, CSS, JavaScript

Databases: SQL

Tools: GitHub, VS Code

Core: DSA, OS, CN, DBMS, AI, ML

INTERNSHIP

ServiceNow Virtual Internship – Cohort 3 | Remote 2026 – Present

- Gained hands-on experience with ServiceNow platform focusing on ITSM modules including Incident, Problem, and Change Management
- Designed and configured custom forms, tables, and service catalogs for structured data handling
- Implemented workflow automation using business rules, client scripts, and UI policies
- Simulated enterprise-grade ticketing systems to optimize service request lifecycle and resolution efficiency
- Strengthened understanding of cloud-based enterprise workflow automation and digital service management

Prodigy Infotech | Web Development Intern | Remote Jul 2023 – Aug 2023

- Developed responsive web applications using HTML, CSS, and JavaScript following modern UI/UX practices
- Built multiple projects including portfolio website, weather application, landing page, and interactive Tic-Tac-Toe game
- Integrated REST APIs for real-time data rendering and dynamic content updates
- Optimized performance and ensured cross-browser compatibility

PROJECTS

AI Resume Analyzer

- Developed a full-stack AI-based Resume Analyzer using FastAPI, Python, and frontend technologies (HTML, CSS, JavaScript)
- Integrated Large Language Models (LLMs) for ATS score prediction, skill gap analysis, and personalized roadmap generation
- Implemented backend APIs for resume parsing, text extraction, and intelligent evaluation
- Designed scalable architecture for handling multiple resume inputs efficiently

Student Drift Detection System

- Built an AI-driven system to detect performance drift in student datasets using machine learning techniques
- Trained and fine-tuned models using Hugging Face AutoTrain for predictive analysis
- Developed data preprocessing pipelines and feature engineering workflows
- Created an interactive interface for dataset upload, visualization, and performance monitoring

CERTIFICATIONS

- ServiceNow – Certified System Administrator (CSA)
- Hackathon Participant – Vertex
- Cisco Network Academy – Python Essentials
- TCS iON Career Edge – Young Professional
- EduSkills – AI Workshop
